José David Campos

Junior Data Scientist | Computer Science Undergraduate

Caracas, Venezuela (Remote) jd19122003@gmail.com linkedin.com/in/josedavidcampos github.com/JD1714

Professional Summary

8th-semester Computer Science undergraduate with a strong foundation in predictive modeling, Machine Learning, Deep Learning, NLP, and end-to-end software development. Practical experience as a Computer Networks Teaching Assistant and hands-on reporting workflow development using React and Google Apps Script. Passionate about transforming complex data into scalable solutions.

Academic & Professional Experience

Computer Networks Teaching Assistant

Universidad Central de Venezuela (UCV)

- Designed and led hands-on laboratory practice sessions for undergraduate students, solidifying technical foundations in computer networking and protocols.

Software Development & Reporting Intern

Faculty of Economic and Social Sciences (FaCES - UCV)

React, Google Apps Script, JavaScript

- Developed a reporting and automation project to streamline internal institutional data workflows.
- Built responsive user interfaces with React and deployed integrated solutions using Google Apps Script.

Software Developer (Frontend & Integration) — Kromáticos

12/2025 – 05/2026

React, TypeScript, Zustand, Zod, REST APIs

- Developed modular interfaces for the *Gravo* web platform, focusing on efficient data visualization and global state reactivity.
- Integrated RESTful web services ensuring strict data schema validation and type safety with Zod.

Featured AI & Data Science Projects

Transformer-Based Toxicity Classifier (NLP)

2026

Python, PyTorch, Transformers, NLP, Weighted Loss Functions

- Fine-tuned Transformer NLP models on text datasets for multi-class toxicity classification.
- Addressed dataset bias and class imbalance by implementing custom weighted loss functions.

Sports Metrics and Match Results Predictive System

2026

Python | Scikit-learn, XGBoost, Random Forest, Pandas, Streamlit

- Implemented data pre-processing pipelines and feature engineering over multidimensional datasets.
- Trained and benchmarked supervised machine learning models (XGBoost and Random Forest), optimizing hyperparameters.

Prompt Engineering Framework & Generative Model Evaluation

2026

LLMs, Prompt Engineering, Quantitative Evaluation

- Designed advanced prompt structuring techniques to maximize precision and consistency in LLM-generated responses.

Education

B.S. in Computer Science (8th Semester)

Universidad Central de Venezuela (UCV)

- Rigorous coursework in Algorithms, Probability & Statistics, Machine Learning, Deep Learning, and Databases.

Technical Skills

ML & Deep Learning:	PyTorch, Transformers, Scikit-learn, XGBoost, Random Forest, NLP, Deep Learning, Predictive Modeling, Prompt Engineering, LLMs.
Analysis & Data:	Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, EDA, interactive dashboards, KPIs.
Engineering & Web:	React, Google Apps Script, TypeScript, Docker, Git/GitHub, REST APIs, Linux.
Languages:	Spanish (Native), English (Professional Working Proficiency / Technical Documentation).
